

MAINTENANCE OF OUR PLATFORM OF EVOLUTION

I AM the full activity of God—all else has no power to move me—nought else shall ever pass into my world, mind and affairs, surrounded right now by my God-given, God-created 'ring-pass-not', the canopy of the sacred fire! In the name of Almighty God! Come forth Beloved Seven Mighty Archangels of God and stand where I AM: beloved Archangel Michael, Jophiel, Chamuel, Gabriel, Raphael, Uriel, Zadkiel, Uzziel. Place your electronic presence over { insert names } for the maintenance of our platform of evolution. Let the 'ring-pass-not' insulate all of us from the mass consciousness; and serve as an electrode intensifying the action of the All-Seeing Eye of God so that we may perceive those threats and dangers that are sent against our lives, our family, and our loved ones.

Disinfect our consciousness from any astral microbes or viruses that may have already penetrated into our four lower bodies. Shield us against any further bombardment by dark forces; and any aggressive attempt of the fallen ones to penetrate our four lower bodies with any manner of disease. Protect and seal our consciousness, our four lower bodies, our minds, our souls, and the Christ flame that abides within the secret chamber of our hearts. Raise up the mother flame within us and protect our charkas - both at the etheric and physical plane, especially our heart, our crown and third eye. Encircle our nerves centers, our metabolism, our DNA, and the organs that are key to the functioning of our physical bodies including the liver, gall bladder, spleen, pancreas, thyroid, thymus, adrenals, kidneys, stomach, intestines, lungs, eyes, retina, ears, hypothalamus, pituitary, other glands, and brain. I call to Justinius, captain of the Seraphic Host for his crystalline helmet of light to shield our minds and brain.

Mighty Ones! Separate and disentangle us completely from the fallen ones - both in consciousness and in conscious cooperation -- so that we are not caught betwixt and between when their judgment falls upon them. I call for the resurrection and the healing of our fire body and the restoration of the etheric memory of the origin of God. I call for the healing of the mind and the plane of the air. I call for the healing of the desire body and the soothing of the waters of the mind. I call for the healing of the physical envelope. Dissolve any wedges of darkness that block the flow of light through our four lower bodies and reestablish the divine flow of the Alpha spiral through our etheric, mental, emotional, and physical bodies thereby completely restoring the feeling of God's love, holy purpose, divine consciousness, and the sense of the close proximity of the Masters presence. And if the Great Law would allow it, I call for the decent of our spiritual genes that are stored in our Causal Body to be available to us through the pure stream of our crystal cord.

Let these calls be adjusted according to the holy will of God and implemented according to that will by thy wisdom, and by thy love, in time and space and in the eternal cycles of being.
